

Blessings in a Backpack

The Chichester Educational Foundation will be supporting the Chichester School District in their participation in Blessings in a Backpack, a National program that helps to mobilize communities and resources to provide weekend food for students who might otherwise go hungry.

Many of our students depend upon school breakfast and lunch to provide their main source of nourishment during the week. For some children, weekends represent 65 hours of hunger. To meet this need, Chichester School District will be providing weekend meals for food insecure students through the Blessings in a Backpack program. Identified students will discretely and confidentially receive nutritious and satisfying food, each Friday, to see them through the weekend. This program is grant funded; however, a condition of the grant is to secure additional funds to support the program. The Chichester Educational Foundation is happy to announce that they have made a \$500 donation to support the students of the Chichester School District.

*Who will feed
the kids
this weekend?*
